Knowing Keeps You Growing

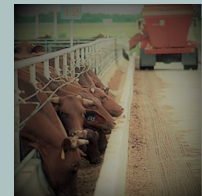

Fall 2023

Silage Season:

Silage/Earlage

Grain Piled for Feed

1st	Call Buck Agency
2nd	Talk to Adjuster
3rd	Chop/Harvest

If you are planning to put up crops for feed, please call our office to set up a Notice of Inspection. An adjuster will get the crop's production measured and provide the records needed to eliminate keeping feed records. With the dry season and crops changing quickly, advance notice will make the adjustment process proceed more smoothly for both you and the adjuster!

Working Insured Acres

Remember that turning in a Notice of Inspection is necessary any time you plan to destroy a crop in any way (i.e. - chopping, piling feed, tilling droughty acres,...) this allows an adjuster to get the necessary measurements **prior** to the crops destruction.

Comingling Crops

Request a bin measurement! Bin measurements need to be taken prior to comingling your 2023 crops with previous years crops and will help keep your records straight.

Fall Harvest Prices—Set in October Discovery

The harvest price, used to determine harvest values, will be established during the month of October and is based on CBOT December futures for corn and November futures for soybeans. To follow the harvest prices use the following website.

<https://prodwebnlb.rma.usda.gov/apps/PriceDiscovery/GetPrices/YourPrice>

Watch for Upcoming Bills

	MPCI	Crop-Hail
Billing Date:	September 1st, 2023	October 1st, 2023
Payment Due By:	October 31st, 2023	December 31st, 2023

Take a Look at Your Schedule of Insurance

We put together some short descriptions of the main headings found on your SOI. Keep in mind that your elected unit structure will always impact the way losses/claims are handled. Call Buck Agency with any additional questions.

		Description
1	Crop Plan	Crop planted and insurance plan.
2	Acres Plant Date	Acres of crop planted and date planted.
3	Approved Yield	Based on your 10 year history, this is the bpa yield that your insurance guarantees are based on.
4	Acre Guarantee	Coverage per acre in bushels and \$.
5	Guarantee or Amount of Coverage	Total bushel guarantee and total \$ guarantee.
6	Price	Price that your \$ guarantees are based on.
7	Interest	Interest (share) in the crop
8	Liability	\$ guaranteed for your share of the crop
9	Gross Premium	Total cost of insurance.
10	Premium Subsidy	Dollars of insurance cost subsidized by government.
11	Insured Premium	Dollars of insurance cost paid by insured.
12	2023 Total Prod	A place to record the bushels harvested in 2023.
